ABOUT METO

EXCELLENT MERCHANDISE IDENTIFICATION AND LABELING
METO – A STRONG BRAND

Innovation is all part of our company traditions. Products bearing the METO brand name have been available since 1918. The first handlabeler from the company revolutionised pricing operations in 1959. This marked the first in a long line of products which were to have a lasting influence on the market. In 2016 METO became a business unit of CCL Industries Inc. The brand name has been retained and continues to stand for the familiar high standard of quality. As an internationally operative group we are a global leader in labeling, identification and sales promotion systems.

We offer integrated system solutions and firstclass services for a smooth flow of goods throughout the supply chain. We are a competent partner to retail, industry and the service sector.
HAND LABELING SOLUTIONS

INTELLIGENT TECHNOLOGY IN EACH TOOL – FOR ALL DEMANDS THE RIGHT LABEL

Trust our experience of more than 55 years. We offer the right hand labeler for every need e.g. industry-specific marking solutions, as for the sterilisation of medical equipment, the weatherproof outdoor marking or labeling in industrial production.

MADE IN GERMANY
Our handlabeler are also available with other currency signs and in individual device combinations.

Security cuts
Security cuts protects pre-labelling by customers. The security cut destroys the label.

Perforations
Perforations are important in combination with partly gummed labels, where one part has to be removed.

Relax cuts
Relax cuts guarantees the optimum on adhesion on curved surfaces.

Cartex-cut
This cut allows the shooting of Cartex hang tags (coated plastic labels without adhesive) using swifttags.
Customers remember good service

Have you ever wondered why customers return to the same places, even though they may offer the same products at a higher price?

The answer is Customer Service!

Using TURN-O-MATIC® means that customers will be served in the right order but can walk around while they are waiting.

When customers are taking a number from a queuing system they feel more fairly treated and they get the feeling that service is more efficient. Giving them the freedom to move makes them feel less stressed and at the same time they tend to buy more.

TURN-O-MATIC is not only an advantage to your customers. Your staff as well will benefit from the investment. Stress is reduced, work better as a team, Customer contact is more positive and customers are more civilised.

1. Arriving customers take a ticket from the dispenser.
2. The ticket number reserves their turn for service.
3. Service staff call each customer in turn by stepping the ‘NOW SERVING’ indicator.
4. Waiting customers are free to move around, browse, shop …
5. … until their serving turn number is displayed.

HappyOrNot – Customer Satisfaction Analysis

A specific question for the customer, four self-explanatory smiley buttons for spontaneous replies, a wireless device at the desired spot and all the results swiftly evaluated – the simple way to measure customer satisfaction! HappyOrNot is a mobile service device to promote lasting customer loyalty which can be deployed wherever customers come into contact with a product, an offer, a service or a new item. Asking customers a readily comprehensible question here and offering them a straightforward, anonymous means of responding directly yields important information on buying behaviour. A crucial aspect is the fact that HappyOrNot evaluates these data on a daily basis and transmits the results to the client at a defined time, enabling swift action to be taken as necessary. This provides chain store companies in particular with an effective means of avoiding declines in sales, losses of customers, uncertainty or dissatisfaction while offering an ideal instrument to support change processes or market launches. At the same time, customers feel that they are being taken seriously and that their custom and opinions are appreciated. This establishes closer ties with customers and improves customer satisfaction, leading in the long term to stable or improved sales.

Who benefits from HappyOrNot?

HappyOrNot is suitable for all areas of business in which it is important to know customers’ opinions. As an ideal customer barometer, it remains in direct contact with customers throughout the opening hours of chain stores, retail outlets, service companies or catering establishments, its wireless design enabling it to be deployed wherever appropriate. There’s no faster way of gathering and evaluating customers’ views.

METO®, a business unit of CCL Industries Inc., offers the global retail sector a great variety of innovative and highly cost-efficient labeling and sales promotion solutions. These include in-store communication and advertising, shelf management, merchandise identification and labeling and shopping convenience.

Over the past 55 years, METO has invented an ongoing succession of sales promotion and merchandise labeling solutions which define today’s standard practice in the retail sector. METO develops solutions which are easy to handle and set up. As such, these solutions meet the requirements of a retail sector which faces constant change and which operates according to the motto: time is money. Solutions from METO help to ensure effective communications in all areas from pricing through advertising to information on product origin, use-by dates or other details which play a role in the sale of merchandise.

METO combines quality with durability and inspires retailers to communicate with their customers in an effective manner.

METO’s success is due in part to its close cooperation with retailers, service providers and industry. These partnerships enable us to continue developing innovative concepts for our customers.
